# Yazan Alqasem

---

I'm a software developer working with JavaScript and TypeScript in full-stack development. A passionate GNU/Linux enthusiast, I daily drive Linux systems. I love web development and enjoy pushing the boundaries of what the web can do, while also exploring system programming to deepen my technical expertise and expand my understanding of computing.

## SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python
- **Deployment/Tools:** Git, GitHub, Docker, Cloudflare, Linux, Nginx
- **Front-End:** WebAssembly, React, Vite, NextJS, TailwindCSS
- **Back-End:** Node.js, Deno, Bun, Express, Hono
- **Databases:** SQLite, PostgreSQL, Redis, Prisma, Drizzle

## EXPERIENCE

### Full-Stack Web Developer - Personal Projects - <https://github.com/vwh>

May 2022 - PRESENT

Created solutions for freelance clients and personal projects, designing and building full-stack applications using modern frameworks and tools such as JavaScript, TypeScript, React.js, and Next.js. Developed RESTful APIs and server-side applications with Node.js, Deno, and Bun, while working with databases like SQLite, PostgreSQL, and Redis to ensure efficient data handling, storage, and scalability.

## EDUCATION

### Bachelor of Computer Science - Jadara University

Oct 2021 - June 2025

Studied core computer science topics, including data structures, object-oriented programming, software development, algorithms, and operating systems, with a focus on problem-solving and building scalable, efficient solutions.

### Backend Development - Boot.dev

Completed courses and projects in Boot.dev, a rigorous computer science and backend engineering program, covering topics such as DSA, OOP, functional programming, web servers, Git/GitHub and SQL databases.
